

Johnson
**A family who emigrated to South
Australia in 1847**

Graham Jaunay

2023

Companion titles:

Johnson: a family who emigrated to South Australia in 1847
Cannell: a family from Swardeston Norfolk from the time of Elizabeth 1
Thurston: a Great Walsingham Norfolk family from John who died in 1623
Webster & Robins: families from Swardeston & Thompson in Norfolk
Tuck / Roper: a family from Colton in Norfolk
Jacob / Cooper: a family from Colton in Norfolk
Larner: a family from Matlaske Norfolk
Helsden: a North Walsham Norfolk family from Robert Heyllesdon 1502–1541
Westbury: a family from Fairford Gloucestershire
Harris: in the shadow of Millbank's walls
Summerhays: a family with origins in the Upottery region of Devonshire
King: a family from Harlow (now Old Harlow) in western Essex
Grummitt: the descendants of John Grumant who married in 1642 at Cranfield

FORWARD

Première Qualité published in 1994 told the story of my Jaunay ancestry in the nineteenth century. It followed on from two earlier books about my mother's ancestry—*A toast to the future* in 1986 with a supplement in 1992 and, *The Cannell Connection* in 1994. These books were written in a pre-Internet era and were resourced using the memories of my family, library records, correspondence and the services of some professional genealogists in England and Europe.

Since 1994, the Internet and travel to numerous locations in Britain and France seeking information has shed a light on much more information and linked me with distant relatives who share my interests. This culminated in, *Make the skeletons dance* in 2016. This book brought together much more newly found information for both my paternal and maternal lines.

Now this book (which is part of a much larger set as detailed on the next pages) not only updates my family ancestry but looks at developing the collateral lines too. In fact so much information had been uncovered, that to retain some form of reasonable management, I have restricted the focus to my fifth cousins or closer! Even with this limitation the number of names collected currently exceeds 52,500!

This collection of family charts summarising known information brings the reader up to date with my almost continual family history research of 50 years. The material is presented in two sections...

- The first comprises basic charts showing relationships with major life events by date and place with an index.
- The second details the major sources for the information on the charts.

Readers are advised to start by checking the index to the charts to see if a familiar name in your family is mentioned and progress from that point!

All family histories are works in progress. This means that there are likely to be errors regardless of how much care is taken in compiling the data. Every attempt has been made to find a least two pieces of collaborating data, but this has not always been possible. In the case of common names some material is too ambiguous or lacks sufficient detail to know whether it is appropriate or not. In most cases this evidence has been ignored but a few seem too likely to be omitted even though I cannot be 100% certain they are correct and if it proves to be incorrect then the fault is mine entirely.

Johnson family 1904
L-R: Olive, Ada, Vida (front), George, Clara, Norman. Louisa, Gladys, Rena, Horace, Edgar.

NOTES

The charts within this edition are updated versions of the charts in the previously mentioned publications.

A number of conventions have been employed to assist in navigating these charts.

1. Relationships at the head of each page pertain only to the author.
2. Direct ancestors/descendants are displayed in red. **Allan Edgar John JOHNSON**
3. Relatives are displayed in green. **Thomas Rackham CANNELL**
4. Persons displayed in black are not blood relatives but related by marriage.
5. Unless otherwise stated on the page, the data attached to each name is as known.
6. Navigate from chart to chart using the page numbering system.  
7. A descent line with a bar indicates no known issue. No line where issue is unknown.
8. The data against each person on the chart should be read from the top down as it relates to that person at the head of the entry. If spouse previously or subsequently married this is noted where known.
9. Individuals killed in military conflicts or died of wounds are marked with a poppy. 
10. Known matches of yDNA (paternal), mtDNA (maternal) and atDNA (shared) are indicated on the charts. 
11. Dates are recorded according to the calendar used by the jurisdiction at the time. See the following note on this topic.

In an effort to detect when name changes occurred, surnames recorded are those found in the earliest known record for each individual. However, given names recorded are those most frequently used over a lifetime. In the main nicknames and other abbreviations have been ignored in the charts, but some of this information is shown in the sources section.

The degree of kinship between two persons related by blood outlined in the following charts applies only to the first cousins of the compiler. All other relationships need to be calculated using the usual guide lines or online cousin calculators.

Undertaking family history research in the UK may require an understanding of the changes made in the calendar...

To 1751 the British Isles formally followed the Julian calendar whereby the year commenced on Lady Day, 25 March and ended the following year on 24 March. From 1752 the year would officially begin on 1 January. In 1752 the calendar was adjusted in September to accommodate the leap years not previously recognised by the deletion of the dates 3 to 13. This was important because much of Europe had already addressed this matter previously! The new calendar was known as the Gregorian calendar. To make it clear dates on charts from 1 January to 24 March prior to 1752 are dated for both calendars. Thus, a baptism on 3 February 1712/13 means the event occurred in 1712 under the prevailing Julian calendar but by today's Gregorian calendar would be recognised as occurring in 1713.

Essentially I have taken all my maternal ancestors and published a set of charts for each line. In one case a family, the Cannells, proved too large to manage as a single publication and so it was further subdivided. Some further juggling was undertaken to accommodate the smaller branches of the family. This is detailed in the following table with the subject of this book highlighted...

SOURCES

1. The following pages give the sources for the data on the charts.

2. Each person in the charts is recorded on the pages following in alphabetical order.

3. Abbreviations used can be found on the adjacent table. Location codes for places such as SCT for Scotland are explained on each chart page.

4. A blank source field or an unsubstantiated note indicates the information has been provided without supporting documentation.

5. Age: indicates the age at death or the age at time of publication.

6. Occupation: adapted from a range of records.

7. Census: dates indicate a census return is on file.

8. Parents: recorded if known, but no determined attempt has been made to locate parents of people marrying into the family.

9. Children: the tally is for all marriages.

10. Birth: if the baptism is known then this is included within brackets. If the baptism is the only known early record then this is entered instead of the birth.

11. Marriage: in the case of more than one marriage, details of other spouses are listed under the other spouse name. Previous and subsequent marriages of persons marrying into the family are not listed but a note may be found in the charts.

12. Death: if the burial/cremation is known then this is included within brackets. If the burial/cremation is the only known record then this is entered instead of the death.
